SPURIOUS PETITION AGAINST VEGANISM

Children who come across vegan propaganda learn that dairy cows are killed once they become less profitable for milk production. This knowledge often makes them feel uncomfortable, some will even question their own milk consumption.
Some 'vegan literature' focusses on eggs rather than milk, the narrative is much the same; once laying hens become less profitable for egg production, they are slaughtered and replaced.

As an independent bipartisan body of concerned parents, we petition the Federal Government to ***ban vegans from advocating non-violence towards animals.*** This ban shall include, but is NOT limited to Facebook, Twitter, and conventional print media.
