

Our Philosophy

We believe that ALL students need a firm foundation of higher level thinking in addition to their school curriculum. As educators, we want students to be able to thrive in their environment and solve problems in new and creative ways.

Mission Statement

We support parents and educators by building a foundation of thinking that will enhance every area of learning for all children.

Our Goals

We will equip ALL students with:

- ♦ creative thinking skills
- ♦ critical thinking skills
- ♦ enjoyment in the learning process
- ♦ freedom to take risks while learning

What We Are

- ♦ An after school enrichment program for ALL students
- ♦ A program where students take risks and have fun in their learning
- ♦ A program where students learn thinking skills essential for success

“Take chances, make mistakes, get messy!” ~Ms. Frizzle

What We Are Not

- ♦ A program just for the gifted and talented population
- ♦ A tutoring center to reinforce or re-teach basic skills
- ♦ A prep center to prepare students for standardized tests

What We Offer

We provide a fun, collaborative environment where students participate in mind-stretching brain games and activities that teach higher-order thinking skills such as logical thinking, analytical reasoning, and creative thinking.

Our Classes

Right now, our classes are designed for 2nd/3rd grades and 4th/5th grades. We are always designing new and exciting classes and will add them as they come available.

If CraniaLogix is not already at your school, talk to your Administrator or PTA and let them know you want us there! We will work with them directly to create the perfect class(es) for ALL students.
