WILL INCREASE YOUR CATCHES

Lures, Hooks, Holds – Unaided

*Check your local regulations
before using this device.*

HOOKS – PLAYS – LANDS WITH ASTONISHING SUCCESS

WHITE'S AUTO-FISHER

The Auto-Fisher was developed by an expert fisherman who has spent a lifetime at the sport. His idea was that if the ordinary fisherman could set out ten times as many hooks he could catch ten times as many fish. The result was this Auto-Fisher which will catch and land fish unaided and which can also be bought at a price that will enable any fisherman to use a large number of them. It is especially fine for a family fishing party or picnic or to take the youngsters fishing.

The Auto-Fisher incorporates the fundamentals of good fishing technique. It is quiet, still, and always on the alert. When the fish takes the bait the Auto-Fisher sets the hook firmly in his mouth and proceeds to play him--ALWAYS HOLDING A TIGHT LINE! This eventually tires the fish and draws him to the surface. You get plenty of action as he fights it out! Most fish are lost by permitting slack in the line or failure to properly set the hook when the fish bites. Auto-Fisher eliminates these difficulties, will increase your catches, and save bait.

The Auto-Fisher will positively catch every kind of fresh water fish including trout and bass. Requires no aid whatsoever. Also catches many varieties of salt water fish. Makes it possible to catch fish in clear, shallow water. Note that the latch slots are arranged so that it can be set for a hard, medium or light pull. Should be fished 2 to 3 inches above the surface. The spring tension can be increased or decreased and the line can be lengthened or shortened by winding or unwinding the line from the Auto-Fisher.

You will occasionally be bothered by small fish nibbling your bait and they may trip the trigger. To correct this use LARGE LIVE BAIT and larger hooks and let Auto-Fisher wait for the big ones. Of course, if you want to take the smaller fish, use small hooks and cut bait or worms. Use a simple slip knot with bow to tie Auto-Fisher to limbs, etc., so that it can be detached easily.

The Auto-Fisher can be fished from pole, dock, boat, limb, ice fishing.
