2019-2020 CARMA Membership Information

We are excited to announce the key features of next year’s 2019-2020 CARMA institutional membership programs. In the following sections you will find information about next year’s webcast lecture speakers, our Video Library, and other content that will be included with our membership programs. The table below outlines the details of each membership, and the following pages give overviews and schedules for each event.

# CARMA Webcast Lecture Series

## Overview:
The CARMA Webcast Lecture Series was established in 2004 to provide university faculty, graduate students, and other researchers with advanced training in research methods and data analysis. This annual series consists of ten live webcast lectures presented by nationally recognized methodologists. These lectures are developed at an introductory and advanced doctoral student level and will typically include an introduction to the topic as well as a consideration of current technical issues. Emphasis is placed on the application of the research method technique. For members with access to the series, three access points for group viewing are allowed for each lecture and all faculty and students are eligible to view. Prior to each lecture, background readings, references, and PowerPoint slides for the presentation will be available on the CARMA website.

**Live Access:** Institutional Premium members only

## 2019-2020 Live Webcast Schedule

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Instructor/Topic</th>
</tr>
</thead>
</table>
| Sep. 6, 2019 | 12pm EST | Dr. Paul Bliese, University of South Carolina  
**Topic:** Multilevel Analysis |
| Oct. 4, 2019 | 12pm EST | Dr. Justin DeSimone, University of Alabama  
**Topic:** Dirty Data |
| Nov. 8, 2019 | 12pm EST | Dr. Sang Eun Woo, Purdue University  
**Topic:** Big Data |
| 1:15pm EST |        | Dr. Fred Oswald, Rice University  
**Topic:** Big Data |
| Jan. 24, 2020 | 12pm EST | Dr. Deborah Bandalos, James Madison University  
**Topic:** Exploratory/Confirmatory Factor Analysis |
| 1:15pm EST |        | Dr. David Waldman, Arizona State University  
**Topic:** Neuroscience Methods and Organizational Research |
| Feb. 21, 2020 | 12pm EST | Dr. Le Zhou, University of Minnesota  
**Topic:** Longitudinal SEM |
| 1:15pm EST |        | Dr. Erik Heggestad, University of North Carolina-Charlotte  
**Topic:** Scale Development |
| April 3, 2020 | 12pm EST | Dr. Gail Fairhurst, University of Cincinnati  
**Topic:** Grounded Theory/Discourse Analysis |
| 1:15pm EST |        | Dr. John Kammeyer-Mueller, University of Minnesota  
**Topic:** Ethics and Research Methods |
CARMA Video Library

Overview:
Archived versions of all Live Webcast Lectures since 2004 are available within the CARMA Video Library. The Video Library currently contains over 150 recorded lectures from internationally recognized scholars on a variety of research methods (including qualitative and quantitative). All faculty and students from member universities will have on-demand individual access to all of these recorded lectures at any time from any location. These lectures and related materials can serve as a resource for authors, reviewers, and editors seeking guidance on basic and advanced research methods design and analysis questions. They also can be used as a teaching resource, adding variety to the in-class experience with group viewing and/or as assigned for individual access outside of class, thus enriching the learning experience. Instructors find our videos valuable as they provide insight into current issues in research methods and give students an opportunity to hear from experts in the field of research methods. The recordings enhance knowledge and application of research methods and by providing a basis of discussion and debate.

Access: Institutional Premium and Institutional Basic members
Schedule: All recordings are available on demand throughout the membership period.

CARMA Global Lecture Series

Overview:
One of CARMA’s signature programs since 2004 is its Webcast series. As a supplement to the Webcast series, the CARMA Global Scholars Lecture Series is aimed at increasing awareness of the important methodological work being done by researchers from outside the US. This series will feature a set of one-hour lectures on introductory and advanced quantitative and qualitative research topics that are recorded locally (at their home location) by global scholars. This series includes only recorded lectures- no live viewing is provided. These recorded lectures will be released monthly to CARMA Members during their program membership period and will be found within the CARMA Video Library. PowerPoint slides and suggested readings will be available for each recorded lecture.

Access: Institutional Premium and Institutional Basic members
Schedule: TBA

CARMA Research, Methods, and Better Science Series

Overview:
Our organizational sciences community faces many challenges, and increasingly there is encouragement for fundamental changes in our approach to our research. This series consists of four virtual panel sessions focusing on these changes in research and methods, and features top organizational scholars who are leaders of this change within various academic communities. They will share their views on the reasons behind why these changes are critical for our future success, and their recommendations for specific actions by those in the research ecosystem (e.g., researchers, editors, journals). The panel sessions will be delivered live via a virtual classroom for group viewing, and recordings will subsequently be available for individual viewing.

Live Access: Institutional Premium Members only
Access to Recordings: Institutional Premium and Institutional Basic Members
CARMA Advanced Reviewer Development Series

Overview:
The objective of this new series is to serve as a research methods resource for authors of empirical substantive management research, as well as journal reviewers and action editors. It will consist of four Professional Development Workshops (PDWs) delivered live online during the program membership period, and on-demand recordings will also be available for member viewing. Each PDW will address an advanced research methods topic where there is a need for discussion of key issues, an updated set of references, and a set of recommended practices. This series is being developed in collaboration with the journal Organizational Research Methods (ORM), and it is expected that after ORM editorial review a set of articles based on the PDWs will be published as a Virtual Feature Topic.

Live Access: Institutional Premium Members only
Access to Recordings: Institutional Premium and Institutional Basic Members
Schedule: TBA

Research Methods Education Program

Overview:
The CARMA Research Methods Education Program is based on a series of four modules linked to existing programs and events. The total time requirement to complete the program is designed to be roughly equivalent to typical expectations for a three-course minor in a research university within the United States. Modules will be comprised of different types of CARMA events, including current and past webcast recordings and short courses. Each component of each module will include a reference list of widely available readings, learning objectives, and an on-line assessment experience. Upon satisfactory completion of each module requirement, participants will receive a CARMA Digital Badge (electronic certificate). Following the successful completion of all 4 Modules, they will be recognized as a Distinguished CARMA Research Methods Scholar on the CARMA website. All participating students and faculty must have a RMEP Sponsor from their university. The Sponsor must confirm the participant is an enrolled student or faculty in good standing at their university, and must meet with the participant at the beginning of their RMEP training to assure understanding of CARMA’s Assessment Code of Ethics. CARMA will NOT provide academic credit from the University of Nebraska, but faculty and administrators of graduate programs may decide to provide academic credit at their university once CARMA certifies successful completion of program requirements. It is up to the student's university to decide if academic credit is warranted, and if so how much, based on their university’s requirement. More information regarding what each module contains can be found on our website.

Access: Institutional Premium and Basic Members
Schedule: There is no time limit for completing the program, although there is a 1-year recommended track and a calendar outline for this track.
