## Unmanned Aircraft Systems

Any UAS (Unmanned Aircraft System) is prohibited from overflying the runway and extended centerline and from overflying east and west parallel taxiways.

Overflight of private property is allowed only with the property owner's written consent.

Any property damage caused by operation of a "drone" (i.e., UAS) is the responsibility of the drone operator.

Operators must fly in accordance with all FAA, Federal and State regulations.

This policy can be waived on an individual basis for special circumstances by the Mogollon Airpark Manager.
