

THE

GARDYLOO WATER LASER

Yes, here it is at last, a triumph of hours of research and years of promotion! The Gardyloo Water Laser is guaranteed to keep your cooling tower or boiler completely free of corrosion, algae, scale and albino alligators! (Naturally, we cannot offer this guarantee in the state of Florida.)

CHEAP TO USE!

The GWL will operate for years on a used hearing-aid battery.

EASY TO USE!

Works anywhere! Radiations reach the boiler or tower even from your desk drawer!

SPACE-AGE TECHNOLOGY!

Uses the same type electrons and protons used in the Apollo moon landings!

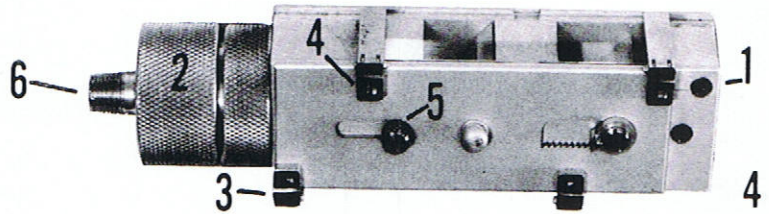

ECOLOGICALALLY SAFE!

Won't destroy the world!

The Gardyloo Water Laser is based upon the well-known Czerny-Schwimmel principle of electrostatic interstitial coherency which causes the frazis and the brazis to grope the rangstorff! Understand?

PARTS OF THE GWL

1. Interstitial activator
2. Fannon spline
3. Don't know
4. Incoherency ablutor
5. Spline buttress

But enough of this complex scientific stuff. Let's look at what the GWL can do:

1. ALGAE - GWL radiation makes these pests more susceptible to diseases such as little algae measles!
2. SCALE - GWL radiation makes metal surfaces smell bad to the finicky scale particles. Instead the scale adheres to the water molecules! This "mineralized" water can then be passed through a demineralizer and re-used!
3. CORROSION - Corrosion simply flees in terror from the authoritative power of the GWL (ecologimetrically speaking)!
4. BOILER CARRYOVER - No Gardyloo Water Laser has ever been found in the carryover from any boiler equipped with a Gardyloo Water Laser. We challenge any competitor to make this statement!

GUARANTEE

The GWL is guaranteed not to sprout wings and fly away. Also, it is guaranteed to make its promoter rich. Good for 5 years or 5 gallons of water, whichever comes first.
