**TO THE PATIENT:** You have the right, as a patient, to be informed about your condition and the recommended medical procedure to be used so that you may make the decision whether or not to undergo the procedure after knowing the risks and hazards involved. This disclosure is not meant to scare or alarm you; it is simply an effort to make you better informed so you may give or withhold your consent to the procedure.

## **GENERAL CONSENT/DISCLOSURE INFORMATION**

Patients who are part of our pain management practice are often scheduled for procedures such as diagnostic and therapeutic procedures. These procedures include, but are not limited to, electrodiagnostic studies, epidural injections, selective nerve root blocks, facet joint injections, botulinum toxin injections, trigger point injections, viscosupplementation injections, prolotherapy injections, and peripheral joint injections, ABI testing, and PRP. Your doctor will discuss with you which specific procedures you may undergo prior to receiving any intervention. These procedures can be diagnostic as well as therapeutic. Ultrasound guidance may be used to improve outcome of joint injection in office. I consent to the use of Ultrasound guidance by physician.

Medical procedures of any sort, even a simple flu shot, carry inherent risk. These risks include bleeding, infection, and pain with the injection, no pain relief, allergic reaction, tissue injury, avascular necrosis, osteoporosis, paralysis, death, and others. These more serious complications are rare, but are a possibility. The risk of bleeding is increased with the use of blood thinners such as aspirin, coumadin/warfarin, Plavix, and nonsteroidal anti-inflammatory agents such as Aleve, Advil/Ibuprofen, and others.

These injections are sometimes done under x-ray guidance called fluoroscopy to ensure the medication is placed in the correct location. **If fluoroscopy is used, you must inform your physician if you are, or potentially can be pregnant.** A routine pregnancy screen may be requested, Injected radioopaque dyes may be used to help identify your anatomy. **You must inform your doctor of any allergies to medications, iodine, latex, or shellfish prior to injection.**

**I have discussed with my doctor and understand the potential risks of the procedures provided by Paragon Pain & Rehabilitation, LLP and any other alternative care my doctor feels is appropriate for my condition. I give permission to have these procedures performed as part of my evaluation and treatment. In addition, I certify this form has been explained to me, that I have read it or have had it read to me, that the blank spaces have been filled in, and that I understand its contents.**

## **SUBXONE PATIENT'S WILL BE REQUIRED TO UNDERGO PSYCHOLOGICAL COUNSELING.** **ALL PATIENT MAY BE REQUIRED TO UNDERGO PSYCHOLOGICAL COUNSELING.**

*PROLO THERAPY is not approved by the FDA, the Food and Drug Administration. The FDA is the federal agency that approves medications for use on humans in the United States. In addition, Dr. Benavides or Vargas has told me that I do have other options or choices to treat my condition. These options have been discussed and are documented in providers date of service dictation. \_\_\_\_\_ (patient initial) \**

**UDS testing is a required test for our pain management patients. The lab we use may be out of network of your insurance plan. Discuss with Urine Collector if you have a concern. UDS is not billed by our practice it is outside lab.**

**\$50.00 Missed Procedure Fee and New Evaluations will be charged on all missed procedures, canceled, rescheduled less than 48 hours of appointment and certainly for all no show procedure appointments. \_\_\_\_\_ (patient initial) \***

**I consent to the release of medical records to pharmacy regarding my prescriptions and refills. \_\_\_\_\_ (patient initial) \***
