

Virtual conference "Adjustments in and to an Uncertain World"

Event date SEPTEMBER **24** 15:00 - 19:20

Event date SEPTEMBER **25** 15:00 - 19:20

A recent tendency to blame globalisation, close borders, increase barriers for international commerce and factor movements produce many uncertainties and a need to adapt and adjust behaviour. Events such as an increased concentration on domestic matters and engagement in trade wars by the US, the British decision to leave the European Union and an increase in global political and economic power by China, among others, call for a deeper understanding of how firms adjust their behaviour within such an uncertain and evolving environment. By focusing on micro-level decisions as well as the major constraints and frictions, we hope to deepen our understanding and draw useful policy implications to adjust faster and more efficiently in the inherently frictional, quickly changing and uncertain world.

Adjustments in and to an Uncertain World
