## Common Terpenes found in Marijuana

### What are terpenes?

Terpenes are the flavor and aroma.

Terpenes have medicinal benefit binding to the cannabinoid receptor similar to cannabinoids like THC or CBD.

**Limonene** - used in many household and cosmetic products. Limonene is a mood lifter. Helps with acid reflux, anxiety, depression and possibly cancer growth. Benefits include elevated mood, relaxation, and stress relief.

**Bisabolol** - Mild floral scent with skin healing properties that are found in cosmetic products. Benefits include anti-bacterial, anti-inflammatory, and anti-irritation.

**Pinene** - Most common cannabis terpene. Pine cone smell and earthy aroma. Benefits include creativity, alertness, focus, and memory retention.

**Caryophyllene** - This terpene has a spicy peppery flavor and aroma. Found in cloves. Discovered to be the first non-cannabinoid to activate the cannabinoid receptor. Benefits are elevated mood, stress relief, pain relief, anti-inflammatory and relaxation.

**Humulene** - is a powerful anti-inflammatory and pain reliever. Humulene is also an appetite suppressant.

**Myrcene** - This terpene helps cannabinoids absorb to the brain. Found commonly in Indica strains, myrcene is great for pain relief, stress, and muscle spasm. Excellent for sleep aid and relaxation.

**Terpinolene** - Smokey or woody aroma. Benefits are pain relief, sedation, sleep aid, antifungal, and anti-bacterial.

**Nevada's Only Medical Dispensary!**  
Must have valid Medical Marijuana Card with government ID  
Accepting out-of-state medical marijuana patients with a valid  
medical marijuana card or doctor's recommendation. Must have  
passport or matching state ID with medical card.

**Warning: For use by Adults 21 and older.  
Keep out of the Reach of Children.**
