

## **JUNE 2021 Thank you message to Living Your Life Without Limits**

**Dear Shannon Jackson,**

We hope this email finds you well. On behalf of Trap Medicine and the Cut Covid Initiative, we want to thank you for your generous donation of blood pressure monitors. Since the beginning of the Cut Covid Initiative in April, we have grown substantially as an organization by expanding our services to not only include covid testing, but to provide vaccinations, relevant health education workshops, routine blood pressure screenings, canvas in teams to discuss vaccine hesitancy and blood pressure management strategies, collect surveys on general wellness and mental health to identify the needs of the community we serve, and connect members to various resources that they have expressed interest in. Your donation has allowed our street medicine team to split up in groups to canvas the surrounding areas of Good Fred's Barber Shop in South LA and take over 60 blood pressure readings of community members while explaining the importance of knowing their numbers and strategies to maintain a healthy blood pressure. Each week, our efforts continue to grow and adapt to the needs of the community. The scope of our accomplishments thus far would not have been possible without our partnership with Living Your Life Without Limits.

Below is our newsletter that highlights some of the work of Trap Medicine and the Cut Covid Initiative throughout May and June. Your generous support allows us to continue building meaningful relationships with the community through trust, research, access, and prevention. We hope to continue purposefully serving the community of South Los Angeles with gratitude for those that have helped us in our efforts along the way. We look forward to partnering with you again in the future and keeping you updated in our endeavors with our monthly newsletters.

Have a wonderful day.

With Gratitude,

Trap Medicine/ Cut Covid Outreach and Recruitment Team
