

# Cybersecurity Checklist

WE'VE PROVIDED A COMPREHENSIVE CYBERSECURITY CHECKLIST TO HELP ASSESS YOUR COMPANY'S SECURITY HYGIENE. IF ANY PART OF YOUR WORKFORCE IS REMOTE OR HYBRID, THESE REMINDERS ARE ALL THE MORE IMPORTANT!

- Has your IT/Security team approved all remote platforms and applications?
- Does your IT/Security team have visibility into all remote worker activities?
- Are you guarding against phishing and spear phishing threats?
- Are your employees trained in doing the basics to prevent breaches?
- Do you require strong credential protections and two-factor authentication?
- Are you safeguarding sensitive information—are technology protocols in place?
- Have you deployed a firewall?
- Are your remote workers using a VPN to connect to your sensitive data?
- Are employee WiFi connections secure? Has public WiFi been removed?
- Are company issued laptops, smartphones used for personal use?
- Is your network, data center backed up. Do you have recovery protocols in place?
- Are security threats reviewed with leadership? Are action plans developed?

IF YOU HAVE NOT MARKED YES TO ALL OF THE QUESTIONS LISTED ABOVE, YOUR COMPANY DATA IS AT RISK. YOU ARE NOT SAFE!

WETZEL AND ASSOCIATES CAN SAFELY GUIDE YOU TO PROTECT YOU!
