

# The house is on fire!

(Dramatic Play)

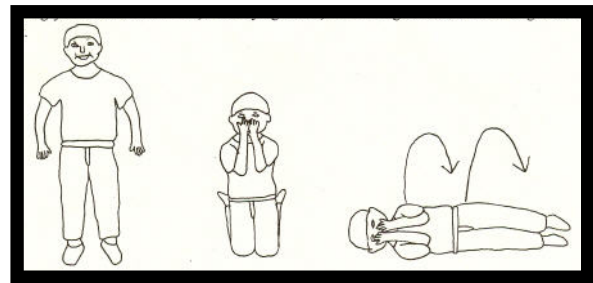

Provide the kids with orange, yellow, and red paper mache or streamer paper, along with tape, and let the kids decorate the dramatic play area by taping the paper over everything to symbolize a house on fire. After they are done, let them pretend that they are a family inside the house and they have to use their fire safety skills to get out quick!

# Stop, Drop, & Roll

(Gross Motor)

Let your children practice this important safety technique by placing out mats in an open area of the classroom. For added fun, make paper mache flames or streamers to tape to the children. Have them practice rolling on the mats to get the “flame” out. Make sure you demonstrate good technique at the beginning of this activity.

# ***FIND MY WAY***

(Gross Motor-Music)

Blindfold a child, and have another child lead them around the classroom by yelling “Fire”. The blindfolded child should do the fire crawl to navigate their way to the other child’s voice.

# Limbo Crawl

(Gross Motor-Music)

Have children play a game of Limbo, only using the different fire crawls to go under the stick instead.
