Accrualify vs. Other Bill Management Software

If you are looking to implement a new accounts payable system to help your finance organization better manage vendors, invoices, and payments, there are many aspects to consider. Something important to keep in mind as you choose a solution is your company's future goals. If growth is a major priority for you, you must ensure your AP solution scales with your needs. You may be comparing us to other business bill management software while making your solution assessments. Here, we detail our main differentiators.

Purchase Orders

Our robust PO management add-on makes vendor onboarding and PO request submissions a breeze.

Approval Workflow Automation

Our products include customizable approval workflows for POs, invoices, and payments that can be defined by any metric that your approval policies call for.

Accrual Automation and Management

We are the only spend management solution to automate accrual requests and vendor estimate to input.

Domestic and International Payments

Make easy, fast domestic and international payments directly from your existing bank accounts

Professional Services

We accommodate custom projects to meet the business requirements of large clients.

Budgeting

Integrate budgets which gives users the ability to more accurately track their spend.

Real-time ERP Sync

We push and pull data real-time with your ERP—no need for an overnight batch sync.

Industry Leading SLA

We offer a dedicated account representative and guarantee support request replies within 24 hours, though we tend to respond faster.

GL Coding

Our platform learns from your bills through AI and provides a GL coding report to see exact Dr/Cr of your bills.

Subsidiaries

Have unlimited subsidiaries and routing based on them, key for growing organizations.
