

Introducing Microdynamics Group's new e-statement.com[®] version 2.0, a best-in-class electronic statement presentment solution, with fully-responsive design for compatibility for all desktop and mobile devices.

With e-statement.com[®] your institution can save significant time and cost by leveraging the system's automated document loading, email notification and document presentment features. And, by utilizing the secure Single Sign-On (SSO) process, your users will automatically authenticate into the system from your online banking, customer portals and other websites. Our Web Services Application Programming Interface (API) allows integration with your core systems, online banking, portals, website, mobile applications and enterprise service bus.

User Experience

- High-performance and high-availability service (featuring redundant datacenters, with emergency power and routine back-up strategies)
- Fully-responsive design
- Easy scrolling, sorting and filtering
- 100% customizable pages and stylesheets to match corporate branding
- Multiple email and text message notifications of newly-arrived documents
- Support for multiple marketing and advertising images
- Customizable Terms and Conditions, FAQs, Company Newsletter and more

System Administration

- Supported Document Types: PDF, HTML, ASCII Text, audio, video and more
- Self-service capabilities
- Customizable dashboard to monitor system utilization, document batch processing, email activity, user clickthrough, etc.
- Version control of changes
- Pre-packaged and ad-hoc reporting
- User management screens
- Manual document loading
- Administration of marketing and advertising images and hyperlinks
- Control of email notification templates (including support for HTML emails)
