

Standard Spray Booths

Production Systems Inc. offers a variety of standard booth sizes for Open Face Spray Booths. Booth enclosures are constructed with 18 gauge galvanized panels and 14 gauge floor channel, tie in angle, corner angels and tee bars. Production Systems' tear drop safety edges give our panels

more strength while eliminating sharp edges. Our new slot and tab filter frame allows for easy installation and booth accessibility for proper maintenance. All standard Open Face Spray Booths can be customized to meet customers needs to ensure a consistent and quality finish.
