Minneapolis Duct Blaster

Part#: DUCT-KIT-001

Southern Refrigeration now stocks the Minneapolis Duct Blaster by TEC. The Minneapolis Duct Blaster is a calibrated air flow measurement system designed to test and document the air tightness of forced-air duct systems in both houses and light commercial buildings. Duct air tightness measurements are used to diagnose and demonstrate leakage problems, estimate efficiency losses from duct leakage, and certify compliance with duct leakage standards.

Click the link below for more information:

It is highly recommended that you get certified with BPI before using this product. This is advanced training that provides background on the broader Building Science behind making these measurements.

Certification training locations, and fee amounts, can be found at the following link:
