

DIM-Z-DALI

DALI TO ELV DIMMING INTERFACE MODULE

APPLICATION

Tempo's Dimming Interface Module converts a DALI dimming signal to an Electronic Low Voltage (ELV) dimming output via a microprocessor based controller. One DIM-Z-DALI is required per run up to a maximum of 600W (120V) or 1,350W (277V).

DIM-Z-DALI does not affect the dimming characteristics of the fixture driver. For example, if using a driver that dims to 5% it will still dim to 5% when using the DIM-Z-DALI to convert DALI to ELV signal.

NOTE: 5 year warranty only valid when used with Tempo fixtures.

Limited warranty when used with non-Tempo fixtures. Any testing for compatibility between the DIM-Z-DALI and all non-Tempo fixtures is the sole responsibility of the customer. Tempo assumes no liability for malfunctions or defects when DIM-Z-DALI is used with fixtures other than Tempo's. Contact Tempo for more information on testing other fixtures with DIM-Z-DALI and lead times for high volume orders.

CONSTRUCTION

- Aluminum housing with extruded aluminum heat sinks
- 48" lead wires, 16 gauge, within 36" flex conduit
- Self-diagnostic fault indicator
- CSA dry location listed
- Plenum rated

ELECTRICAL SPECIFICATIONS

- DALI dimming input converts to Electronic Low Voltage (ELV) signal via a microprocessor based controller.
- 120-277VAC Universal line voltage, 50/60 Hz
- 600W Max (120V); 1,350W Max (277V)
- 7.5A max output.
- <3mA typical current consumption (DALI)
- Operating temperature range of -20°C to 50°C
- Tempo recommends using surge suppression device on each circuit to protect DIM-Z-DALI and fixtures.
