

Christ Church Cathedral, Cincinnati, OH

Juget-Sinclair Organbuilders, 2012 (Opus 40)

Thanks to a generous grant from the H.B., E.W. and F.R. Luther Charitable Foundation, the Cathedral signed a contract in 2011 with Juget-Sinclair Organbuilders for a new continuo organ. The organ is designed to serve as a continuo instrument, provide light accompaniment for choral works, and play early music solo repertoire from various national traditions.
