

FACILITY ADVISER

STREAMLINE YOUR EDUCATION FACILITY INSPECTION PROCESS

THE FACILITY ADVISER SOLUTION IS DEDICATED TO YOUR FACILITY IMPROVEMENT.

We support facility leaders with generating and managing meaningful data that drives continuous improvement to support education environments. We worked with the best professionals in the industry to design a complete system that helps you speak on behalf of your buildings and grounds.

FEATURES

FIT Manager: Provide a simple and easy way to quickly collect, manage, and report FIT data. Generate the state template, see, and filter your deficiencies in real-time and in one place. Exports to state template for SARC. A perfect blend of compliance, efficiency and data management to support education environments!

Facility Inspections: Capture value with preventative maintenance inspections and reporting to support your education environments.

LCAP Facility Monitoring: Support facilities by providing an easy way to share real-time data with district, board and stakeholders throughout the year. Track, Report & Monitor Facility LCAP Goal/Action progress.

Facility Stakeholder Surveys: Discover and reflect on real-time feedback from the observers of your educational environment. Includes model facility surveys that can be modified and used for teachers, staff, parents and students - your community stakeholders.
