

YOLO COUNTY OFFICE OF EDUCATION DATA-DRIVEN SOLUTIONS

FACILITY ADVISER ADVANCES DATA-DRIVEN SOLUTIONS

- County-wide Data Collection for Facility Improvements
- Safety Walk-Throughs for fast and easy Facility Reviews and Analysis
- Get the Team on the Same Page Quickly and Easily

Yolo County Office of Education set an objective of collecting and analyzing facility data throughout the County's education community. OnPoint serves Yolo County with the Facility Adviser Solution aimed at supporting this objective. The teams worked together to identify multiple facility walk-throughs, including Play Ground Inspection, Safety and Security Walks, Fire Extinguisher and California Williams Act inspections. The use of Facility Adviser helped the Yolo County team accurately assess the complete facilities picture quickly and easily, while reducing the workload needed to gather and report on an ever-growing pool of data. Clearly defined Goals with specific look-fors built into the inspection platform helped train new team members, giving leadership time to keep larger project-based work moving forward. Yolo County Office of Education streamlined the Facility Inspection and California FIT data collection and reporting for their Williams and county schools. The result was improved facility inspections with all of the team on the same page quickly and easily.

“Our team can quickly and easily collect facility data, while I can keep working on our larger projects.”

*Matthew Juchniew, Deputy Superintendent,
Yolo County Office of Education*

Facility Adviser's mission is to support facility leaders with generating and managing meaningful data that drives continuous improvement to support education environments.
