Work Experience

Specialized Forensic Unit LLC, Illinois and Wisconsin

Clinical Psychologist, owner (private practice)

09/2016 - Present

Forensic and clinical psychological evaluations for federal and state (Illinois and Wisconsin) courts/agencies: psychosexual evaluations, phallometric assessment (a.k.a., penile plethysmograph, PPG), adult legal guardianship and protective placement evaluations (in WI; e.g., Watts Hearing review), fitness/competency to stand trial evaluations, insanity defense, civil competencies evaluations (i.e., competency to proceed in legal matters), risk assessments, mitigation assessments, FOID evaluations, diagnostic clarifications, disability evaluations, evaluations of parents' mental health who are under the supervision of family court, evaluation of juveniles who are involved in criminal justice, trauma evaluations, malingering of symptoms or incompetency evaluations, immigration psychological evaluations, and general diagnostic evaluations (of adults, juveniles, and children).

Wexford Health Sources, Inc., Chicago, Illinois

**Sexually Violent Persons (SVP) and Sexually Dangerous Persons (SDP)
Evaluator/Psychologist**

07/2017 - Present

Conduct psychosexual interviews and evaluate incarcerated adult and juvenile persons who were convicted of specific types of sex offenses and who are at the end of their prison sentences or in sex offender specific treatment settings, in order to determine whether they meet the Illinois Sexually Violent Persons Civil Commitment Act criteria or Sexually Dangerous Persons Civil Commitment Act criteria. Communicate findings related to the diagnoses and the risk of sexual violence to the Illinois Department of Corrections, the Illinois Attorney General Office, and the

Office of the State's Attorney. Review records, write reports, and testify in court or deposition as an expert witness. Have been certified as a court mental health and SVP/SDP expert witness in Illinois counties of Adams, Bond, Cook, DuPage, McHenry, Monroe, Kankakee, Ogle, Sangamon, and Winnebago.

Lutheran Social Services of Illinois, Shady Oaks Programs, Homer Glen, Illinois
Supervisor of Behavioral Health Services
02/2018 – Present - contracting
08/2014 - 2/2018, Part-Time
07/2007 - 08/2014, Full-Time

The Lutheran Social Services of Illinois, Shady Oaks Programs, is a non-profit organization that includes two 16-bed residential facilities and one day training program for male and female adult patients with developmental and physical disabilities. Majority of clients were diagnosed with intellectual disability, autism spectrum disorders, communication disorders, eating disorders, and mood disorders. Provided professional management for the three programs; organized inpatient and outpatient mental health services for 32 patients; provided supervision, training, and consultation to a team of 48 direct care staff; completed routine and initial psycho-social assessments; completed individualized treatment plans; ensured regulatory compliance for the intermediate care facilities for developmentally disabled individuals; investigated incidents, injuries, and allegations of neglect, abuse, and maltreatment; and communicated the findings to Illinois Department of Public Health.

Wisconsin Department of Human Services (DHS)
Mendota Mental Health Institute, Madison, Wisconsin &
Sand Ridge Secure Treatment Center, Mauston, Wisconsin
ABFP¹ Certified Post-Doctoral Fellowship in Forensic Psychology
Forensic Psychology Fellow, Full-Time
09/2015 - 09/2016

The Sand Ridge Secure Treatment Center is a secure facility that provides specialized treatment services for approximately 310 persons civilly committed under Wisconsin's Sexually Violent Persons (SVP) law, Chapter 980, Wisconsin Statutes. Carried a weekly caseload of 12 hours of group therapy, two individual therapy cases, eight hours of research on Sexually Violent Persons (SVP) population, one assessment report, and three hours of consultation/training direct care staff. Majority of diagnoses included paraphilic disorders, mood disorders, substance abuse disorders, and personality disorders. Provided treatment services guided by the Risk-Need-Responsivity (RNR) model. Completed annual re-evaluations for Sexually Violent Persons civil commitments.

The Mendota Mental Health Institute (MMHI) is a state psychiatric hospital, with various levels of security. Work included competency to stand trial evaluations, restoration treatment for competency to stand trial, risk assessments (for decrease in security levels), supplemental mental examination (to determine whether the individual under NGI commitment can serve his/her time

¹ ABFP stands for the American Board of Forensic Psychology, Inc. The certification refers to training programs in forensic psychology which were determined to meet the ABFP criteria for the five-year experience waiver.

impatiently or in the community), legal adult guardianships and protective placements, and testifying in court on my reports/opinions.

Was an assistant in a research project of Dr. David Thornton focused on developing a dynamic measure for SVP risk evaluations – Structured Risk Assessment - Forensic Version (SRA-FV). The project included weekly reviews of at least two files of patients civilly committed as SVP and scoring their dynamic factors using SRA-FV framework.

Clinical Training Experience

**Minnesota Department of Human Services (DHS)
State Operated Forensic Services, Saint Peter, Minnesota
APA² Accredited Internship Program
Doctoral Psychology Intern, Full-Time
08/2014 - 08/2015**

The Minnesota Security Hospital is a maximum security psychiatric treatment facility that provides long-term (average stay is six years), multidisciplinary treatment to adult forensic populations of men and women. It includes individuals who have been civilly committed as Mentally Ill, Mentally Ill and Dangerous, Mentally Ill and Chemically Dependent, and Mentally Ill and Developmentally Disabled. Carried a weekly caseload of six individual therapy cases, six therapeutic groups, and one psychological assessment. Worked on five different units, which included admission/crisis units and units for patients with stabilized mental illness and problematic personality disorders. Majority of diagnoses included acute and chronic psychotic disorders, mood disorders, substance abuse/dependence disorders, paraphilias, and personality disorders. Provided treatment services at pre-trial and post-trial stages, which included competency restoration groups, mindfulness groups, reasoning and rehabilitation groups for patients with antisocial personality disorders, process groups, social skills groups, perceptual conflicts groups, co-occurring disorders, and treatment services at the Good Lives Program (for male patients with problematic sexual behaviors and/or sexual offenses). Completed assessment reports, which included initial psychological assessments for newly civilly committed patients, treatment reports to court, treatment updates to court, special review board assessments (the board that addresses the treatment needs of the patient and protects public safety with regard to civil commitment petitions), competency to stand trial assessments, risk assessments (to determine readiness for provisional discharge), civil commitment assessments under Mentally Ill and Dangerous statute, Mentally Ill and Chemically Dependent, and psycho-sexual evaluations.

**Northwest Neuropsychology Incorporated, Schaumburg, Illinois
Doctoral Advanced Extern
07/2013 - 06/2014**

The Northwest Neuropsychology Inc. is an outpatient private practice clinic. Provided neuropsychological assessments of children and adults focusing on effort level, attention deficit disorders, traumatic brain injury, migraine headaches, chronic pain, neurological conditions,

² APA stands for the American Psychological Association, a scientific and professional organization that represents psychologists in the United States.

memory, and general assessment of personality disorders, impulse control disorders, and thought disorders. Provided assessments/opinions for pre-surgical evaluations for patients who apply for neurostimulators. The experience included exposure to disability evaluations for the Social Security Administration Disability court.

Illinois Youth Center, St. Charles, Illinois
Doctoral Psychotherapy Extern
09/2012 - 07/2013

The Illinois Youth Center - St. Charles is a medium security state correctional facility for juvenile males. Provided crisis management at confinement units, individual and group psychotherapy, and completed assessment screening at an admission unit. Individual therapy was conducted using an integrative approach. Group therapy was focused on social skills, anger management, problem-solving, psycho-education about substances, parole preparation, relaxation skills, relapse prevention, parenting skills, and grief and loss. Majority of diagnoses included mood disorders, attention-deficit/hyperactivity disorder, substance abuse/dependence disorders, posttraumatic stress disorder, conduct disorder, and learning disorders.

Illinois Youth Center, Warrenville, Illinois
Doctoral Diagnostic Extern
08/2011 - 06/2012

The Illinois Youth Center - Warrenville is a maximum security state correctional facility for juvenile females. Completed assessments focusing on personality, intelligence, aptitude, and achievement; performed individual and group psychotherapy incorporating a cognitive-behavioral approach and elements of Dialectical-Behavior Therapy. Majority of diagnoses included mood disorders, attention-deficit/hyperactivity disorders, substance abuse/dependence disorders, and conduct disorder. The important treatment issues included young motherhood, gender issues, homelessness, severe self-injurious behaviors, and multiple trauma.

DuPage 18th Judicial Circuit Court, Wheaton, Illinois
M.A. Therapy Intern
09/2009 - 06/2010

The DuPage 18th Judicial Circuit Court has a jail, probation, and pretrial departments. It provides outpatient and inpatient treatment services. Provided individual psychotherapy to adult and juvenile offenders and their families in the milieu of their home environment; completed structured intake interviews for the individuals in substance abuse/dependence and sexual offender probation programs; provided ongoing probation and pretrial investigation interviews; developed appropriate referrals to treatment facilities; and provided patients' progress reports in open court. Majority of diagnoses included mood disorders, substance abuse/dependence disorders, anxiety disorders, paraphilias, and psychotic disorders.
