### STATEMENT

I want to start with gratitude. I am grateful to even be in a position in which I feel encouraged, confident, empowered, and passionate to run for such a position again.

Before I even knew how to complete a prophylaxis in less than four hours, I understood the impact our association made and how imperative it is to our profession. It was then I discovered my passion and my desire to be involved in any way I could fit.

Since being given the privilege to volunteer in different aspects of our association, I have grown both professionally and personally. I have learned so much about leadership, our association, and have seen just how crucial collaboration is to growth and success.

I believe one of the requirements of an effective leader is the ability to first listen. The association is only as great as the foundation of our members.

My vision moving forward is not only to contribute to increasing membership but to strengthen and serve our current members, advocate for our profession we all fought so fearlessly to obtain and educate and support our students which are the future of our association.

**“If your actions inspire others to dream more, learn more, do more and become more, you are a leader.” - John Quincy Adams**
