British Columbia Retired Principals' & Vice-Principals' Association

Dear Principals and Vice-Principals,

The number of questions which you are having to answer each day must be overwhelming. We know that having a transparent decision-making process and an ability to relate positively to staff, students, and parents are truly astounding skills. With each step you take, not only are you considering the health and safety of the people in your school building but you must also be aware of the needs of your own loved ones and, of course, your own health and wellness.

While we have all been affected in a variety of ways, the role of a school or District Principal and Vice-Principal is one which is increasingly important and greatly appreciated during the current pandemic.

Please be assured that we fully support you in the awe-inspiring task which you are facing on a daily basis during these trying times.

Yours sincerely,

The Executive of the BCRPVPA on behalf of its Members
