800-30 VINE STREET RFP
QUESTIONS & ANSWERS

The following questions were submitted by the October 28, 2016 deadline provided in this RFP’s schedule.

1. **What is the maximum building height limit on the block?**
   
   Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

2. **Does PRA have a title report for the entire site or portions of the site that can be reviewed?**
   
   PRA has a title report and can make it available to the selected developer. When PRA transfers the property, the title will be clean and marketable.

3. **What is the maximum building height limit on the block?**
   
   Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

4. **What is the maximum building height limit on the block?**
   
   Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

5. **What is the maximum building height limit on the block?**
   
   Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

6. **What is the maximum building height limit on the block?**
   
   Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

7. **What is the maximum building height limit on the block?**
   
   Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

8. **What is the maximum building height limit on the block?**
   
   Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

9. **What is the maximum building height limit on the block?**
   
   Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

10. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

11. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

12. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

13. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

14. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

15. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

16. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

17. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

18. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

19. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

20. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

21. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

22. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

23. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

24. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

25. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

26. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

27. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

28. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

29. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.

30. **What is the maximum building height limit on the block?**
    
    Building massing is controlled by floor area ratio (FAR). Please review the pertinent zoning classification to clarify the heights allowable based on the FAR.
