Dear Valued Customer,

Sellick Equipment Limited continues to monitor the COVID-19 developments. We are committed to the safety of employees, customers and suppliers as we navigate the evolving dynamics surrounding the spread of COVID-19. We have a safety committee working closely with our operations, Health & Safety and Human Resource professionals to address working arrangements and safe working conditions. This committee is designed to empower management and disseminate information efficiently and effectively. We have taken active steps to;

- Restrict travel
- Enhance our cleaning procedures and provide training on hygiene practices
- All employees who have travelled outside Canada in the last 14 days have been contacted by Human Resources and are required to work from home for a minimum of 14 days
- Restrict visitors to our facility
- Warehouse employees are advised to avoid any kind of physical contact with customers and should try to maintain a 3 metre distance at all times where possible
- Encourage social distancing

We will continue to provide our operations with the additional resources and support required to deal with this evolving issue.

Currently, our business has not experienced interruptions and continues to operate on a normal basis in order to maintain business continuity. This situation remains extremely fluid. We will continue to monitor the impact of COVID-19 on the areas where we operate and adjust our plans as appropriate.

Thank you for your continued support. We appreciate your understanding as we continue to navigate our business during these unique times.

Stay safe,

David Sellick

Vice-President
