***** Bleacher To Be Assembled by Qualified Personnel Only *****

Note:

- 1) Unpack all parts and check against parts list to ensure that all parts have been included.
- 2) Inspect all parts for damage. Report any damages to the trucking company.
- 3) These instructions are for assembling both a 15 ft and 21 ft wide, 5-row bleacher. The part quantities listed are for both bleachers.

Part List

Item #	Quantity	Part Number	Part Description
SEATING COMPONENTS			
1	3/4	BLCH-5L	5-ROW BLEACHER LEG
2	4/6	BLCHX-80	X-BRACE x 80" L, 5 TH ROW
3	4/6	BLCHX-76	X-BRACE x 76" L, 3 RD ROW
4	11	AR5043 / AR5052	STADIUM SEAT PLANK, 1 1/2" x 9 1/2" x 15 ft / 21 ft
SEATING HARDWARE			
5	63/84	AR5044	5/16" BOLT CLIP
6	22	AR5045A	SEAT PLANK END CAP
7	3/4	HB5030	5/16"-18 x 3" CARRIAGE BOLT, ZP
8	57/76	HB5054	5/16"-18 x 1-1/4" CARRIAGE BOLT, ZP
9	6/8	HB4078	5/16"-18 x 1-1/2" CARRIAGE BOLT, ZP
10	14/19	HN5042	3/8"-16 FLANGE HEX NUT, ZP
11	66/88	HN5046	5/16"-18 FLANGE HEX NUT, ZP
12	2/3	HS289	3/8"-16 x 2" HEX HD CAP SCREW, ZP
13	12/16	HS287	3/8"-16 x 1-1/4" HEX HD CAP SCREW, ZP
14	44	HS5035	#8 x 1/2" PHILLIPS PAN HD SCREW, SELF DRILL
GUARD RAIL HARDWARE			
15	11/12	EP0018	2" x 2" BLACK SQUARE TUBE CAP
16	16	HS5157	3/8"-16 x 2-1/4" BUTTON HD CAP SCREW, SS
17	6/8	HS5163	3/8"-16 x 2-3/4" BUTTON HD CAP SCREW, SS
18	22/24	HW2151	3/8" SAE FLAT WASHER, SS
19	22/24	HN5040	3/8"-16 SLAB BASE TEE NUT, SS
GUARD RAIL COMPONENTS			
20	3/4	GR-RP	REAR SUPPORT POST
21	2	GR-SP	SIDE SUPPORT POST
22	2	GR-CP	CORNER POST
23	2/3	GR-B	GUARDRAIL PANEL - BACK
24	2	GR-F	GUARDRAIL PANEL - BACK END
25	2	GR-S	GUARDRAIL PANEL - REAR SIDE

***** Bleacher To Be Assembled by Qualified Personnel Only *****

Important Notes

- Follow all warning signs and labels on equipment. Use of this equipment other than intended, may be hazardous.
- Before each use check equipment for proper connecting hardware and structural integrity of major components. Replace damaged or missing hardware immediately.
- This bleacher meets the guidelines set up for bleacher safety by the U.S. Consumer Product Safety Commission, Pub. No 330. Accordingly, rows 5 thru 10 have double foot planks and a back riser plank.
- Annual inspection and maintenance of bleachers is necessary to ensure continued safe use. Inspection and maintenance should be performed at the beginning of each season. Contact Jaypro to schedule a field maintenance visit from one of our highly trained specialists if you are unwilling or unable to perform the regular maintenance yourself.

Required Tools

- 1/2" and 9/16" Box Wrench
- 1/2" and 9/16" Socket Wrench
- 7/32" Hex Allen Wrench
- Electric Drill with Phillips Head Bit
- Rubber Mallet

Important Installation Instruction Note

- 1) Bleacher must be located on flat firm ground, preferably on a concrete or crushed stone pad. When placed on bear ground it is recommended that bleacher be installed on treated 2"x 6" wood stringers.
- 2) These instructions are for assembling both a 15 ft and 21 ft wide, 5-row bleacher. The 15 ft bleacher has 3 frames while the 21 ft has 4 frames.
- 3) This bleacher uses two different length braces. Brace lengths are measure from hole to hole.

a) Assemble Understructure:

- 1) Assemble the lower 5-Row frame. Lay out 3 or 4 of the 5-row frames (1) roughly 6 ft apart. Attach the 76" cross-bracing (3) to the third row vertical of each frame using the hardware shown in Detail 1A. Attach the 80" cross-bracing (2) to the rear support member, using the top and bottom holes. Use hardware as shown in Detail 1B (tighten hardware only finger tight until entire base frame is assembled). Ensure that the overall frame is square and all frame sections are in-line and then securely tighten all hardware.

b) Install Seating, Foot and Riser Planks:

- 1) Install safety end caps on each end of all planks as shown above. Lightly tap end cap onto plank using a rubber mallet.

NOTE:

Rows 1 thru 4 have a single foot plank. The foot plank on rows 1 thru 4 should be centered. Row 5 has the double foot planks plus a riser plank.

- 2) Working backwards from the first row, install all seating planks and foot planks as shown in Detail 4A. Ensure that all planks are center on the understructure frame, making sure the overhang on each end is an equal distance.
- 3) Install a riser plank on rows 5.
- 4) Do not anchor the 5th row seat plank at this point.

c) Install Guardrail Rear Support Posts:

- 1) Install one guardrail rear support post (20) at the rear of each frame as shown above, inserting the mounting flange for the support post between seat plank (4) and frame (1) (tighten hardware only finger tight at the point).
- 2) Install the hardware securing the vertical mounting flange of the guardrail support post to the frame, as shown above.

d) Install Guardrail Side Support Post:

- 1) Attach one guardrail side support (21) to the underside of the fourth seat plank, using the hardware shown above. Leave hardware finger tight to allow for future adjustment.
- 2) Repeat step 1 for the other side of bleacher.

e) Install Guardrail Panels:

1. Install the back center panels (23) between the rear support posts as shown in Detail 5B.
2. Install both the back end panels (24) as shown. Attach one corner post (22) to the end of each end panel, using the hardware shown in Detail 5C.
3. Make adjustments to the support posts and enclosure panels as needed to achieve proper alignment.
4. Tighten all hardware attaching the enclosure panels. Next, securely tighten all hardware attaching the support posts.
5. Using a rubber mallet install tube caps (15) in the support post.

f) Final Inspection:

1) After the bleacher is fully assembled, thoroughly inspect the understructure and enclosure assemblies to ensure that all hardware is installed and secured.
