SPECIFICATION SHEET

18V 1/2" HI Torque Driver / Drill is used to assist in the raising and lowering of a manual height adjuster.

The operation utilizes a cordless design to allow ease of use without the necessity of power cords. The unit is equipped with an adjustable clutch for turning the height adjuster via the included adapter thereby offering a level of safety protection to the height adjuster and operator. Reversible drill allows raising and lowering of the height adjuster.

The power and torque is sufficient to raise or lower the Jaypro Model AHA-XX Manual Height Adjuster, as well as many others.

The UL listed unit is complete with 2 rechargeable 18V batteries, 110V charging stand, cordless drill and carrying case. Adapter fitting is also included that easily fits into the keyless chuck of the drill.

The unit is warranted for a period of one (1) year from the date of purchase.
