

# Jaypro Gym Divider Curtains

Jaypro gym divider curtains are constructed of the highest quality reinforced vinyl. Select a vinyl-coated polyester mesh to facilitate air flow, a tough solid vinyl to provide a visual barrier between play areas, or a combination of mesh on the top and solid on the bottom. All Fold-Up and Walk-Draw curtain seams run vertically and are electronically welded with a 1-inch full contact weld. Vertical seam fusion has a superior construction advantage over horizontal seams in its resistance to tearing and breakaway. Due to the rolling action of the Top Roll and Roll-Up Dividers, horizontal seams are required. Vinyl coated polyester materials are flame, fade and mildew resistant, and washable.

**Solid** - Fabric is a durable vinyl coated polyester. Excellent for creating a visual barrier between play areas.

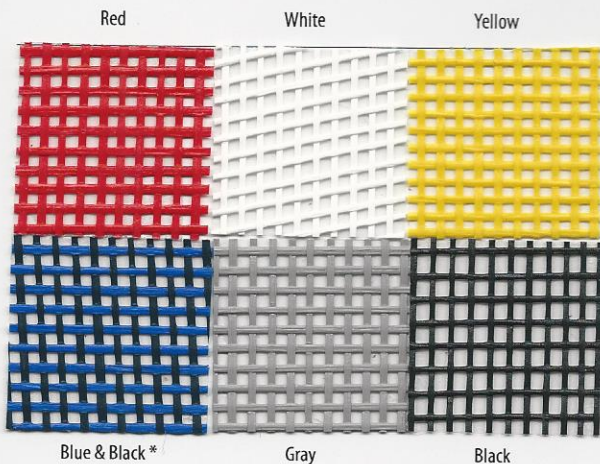

**18 oz. Vinyl Technical Data**  
 General: Solid fabric is a vinyl coated polyester  
 Weight: 17 oz. to 19 oz. per square yard (avg. 18 oz. per square yard)  
 Resistance to Rot, Mildew & Fungus: Excellent  
 Ultraviolet Resistance: Excellent  
 Fire Retardant Ratings: Class A Rating; NFPA 701 (Test 1); California State Fire Code (F-140)

**22 oz. Vinyl Technical Data**  
 General: Solid fabric is a vinyl coated polyester  
 Weight: 20 oz. to 23 oz. per square yard (avg. 22 oz. per square yard)  
 Resistance to Rot, Mildew & Fungus: Excellent  
 Ultraviolet Resistance: Excellent  
 Fire Retardant Ratings: Class A Rating; NFPA 701 (Test 2); California State Fire Code (F-140)

**Mesh** - Fabric is vinyl coated polyester woven from textiles yarn in a one-over-one weave pattern. The yarn is composed of pigmented vinyl, 80%, and 1000 denier polyester, 20%. An economical way to divide floor space without creating sight limitations, and at the same time, facilitate air flow.

**Mesh Technical Data**  
 Weight: Avg. 9 oz. per square yard  
 Resistance to Rot, Mildew & Fungus: Excellent  
 Ultraviolet Resistance: Excellent  
 Fire Retardant Ratings: NFPA 701 (Test 2); California State Fire Marshall 1237.1 Flame resistance Small Scale Test; Federal Standard 191 (5903.2) (Method Vertical)
