

Arts/Science/Adventure Camp 2019

Exploring our World of Wonders! A Montessori Program

Our Planet/Our Community

June 17 - 21

This week we will look in to the three R's. We will investigate Reduce, Reuse, and Recycling practices in our community and look at alternative sources of energy such as solar and wind power. This will be a week of thinking locally and globally! We will build projects using entirely recycled materials, teach kids easy and fun ways to reduce waste, conduct fun experiments involving energy and go on field trips to check out solar arrays, recycling centers and local businesses that are using sustainability practices.

Adventures in Clay

June 24 - 28

This week we'll learn all about the amazing material we call clay and discover its unique geologic story. We'll dig our hands into native Missoula clay, straight from our ancient lake bed to create a collaborative bird bath for the garden, vessels for the home, and mythical creatures from our imagination.

Clay Creations

July 1-3, 5*

Clay, clay, clay! This week we'll explore all kinds of clay building techniques such as pinch pots, coil building, slab building, and wheel throwing! We'll look at the art work of local artists and use these ideas to create dishes, decorations, and sculpture of our own!

Rainbow Love!

July 8-12

Lets learn all about rainbows! We'll investigate the science of rainbows, how are they formed and how do we see them. Then we'll make rainbow inspired creations of light, paint, and fabric. This we'll mix wild hues, create huge paintings and surround ourselves with a world of color!

Wet and Wild

July 15 - 19

This GCM classic camp is for those who love to spend a week getting soaked! This week it's everything water, water fun, water experiments, and playing water games. We'll visit the splash deck one day and the Clark Fork river another. Our week will come to a close with a water EXTRAVAGANZA!

Geology Rocks!

July 22 - 26

This week learn all about the incredible forces that shape our planet earth. We will dig into the study of geology by taking a look at the geologic features in our own backyard. We will take a hike through the North Hills to learn about the Missoula floods, construct our own volcano models, dig deep to learn about what is beneath us, grow geodes, and learn about fossils through simple scientific explorations.

Program Schedule and Fees

Daily Schedule:	Mon - Fri, 9 am - 3 pm * Early drop off at 8:30
Full 6-Week Program:	2 monthly payments of \$495
GCM Discount (enrolled by 5/1):	2 monthly payments of \$460
Weekly Enrollment:	5-day week — \$175 4th of July week — \$155 *
