

Company Overview Fact Sheet

as of June 2019

An Industry Powerhouse

America's premier energy company, with 44,000 megawatts of electric generating capacity and 1,500 billion cubic feet of combined natural gas consumption and throughput volume serving 9 million customers through its subsidiaries; a competitive generation company serving wholesale customers across America and a nationally recognized provider of customized energy solutions, as well as fiber optics and wireless communications.

44,000 MW
of generating capacity

Capabilities in
50 States

9 Million
customers

Approximately
29,000
employees

7
electric & natural
gas utilities

What distinguishes Southern Company?

Electric Operating Companies

Only electric utility in the U.S. developing a portfolio of generation resources – natural gas, nuclear, and renewables such as wind and solar – together with an emphasis on energy efficiency.

Southern Company Gas

A natural gas distribution system that includes four state-regulated local distribution companies (LDCs), serving 4.2 million customers. Gas pipeline investments include investments in six pipelines, including Southern Natural Gas. Gas marketing services complement LDCs and pipeline investments.

Southern Power

America's premier wholesale energy partner investing in clean energy solutions for customers. Southern Power is a leading U.S. wholesale energy provider meeting the electricity needs of municipalities, electric cooperatives, investor-owned utilities and other energy customers.

PowerSecure

Provides energy technologies and services to electric utilities and their large industrial, commercial, institutional and municipal customers. Customer solutions include distributed generation systems, utility infrastructure solutions and energy efficiency products and services.

Growth in Renewables

More than 6,500 megawatts of announced or added renewable capacity since 2012. This includes the largest voluntary solar portfolio in the U.S. at Georgia Power.

Research and Development

- Industry leader in conducting robust research, development and deployment of new, innovative energy technologies.
- Greenhouse gas emissions reduction is a major focus of the company's research and development organization, which has a historic record of technology advancement that goes back to the 1960s.

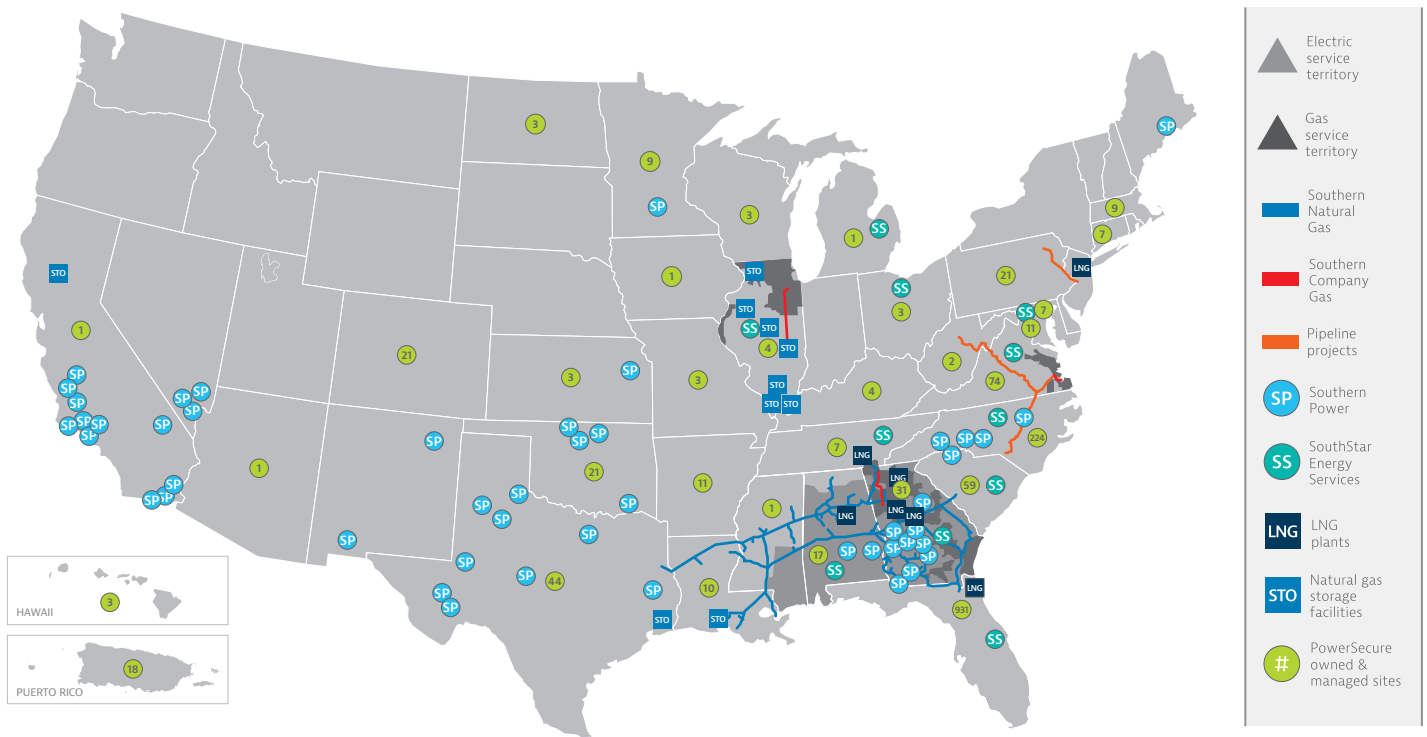

Building the future of energy
