Cultural Sustainability, Food Security and Conservation Through Use
Hunting, gathering and fishing are critical to Inuit culture and economy and the foundation of Inuit food security. The overall goal of the Circumpolar Inuit Wildlife Management Summit is to examine the influence that policies, environmental change, public perceptions, and changing social and economic conditions in the Arctic are having on Arctic wildlife and Inuit food security. The Circumpolar Inuit Wildlife Management Summit will bring Inuit together from Alaska, Canada, Greenland, and Chukotka, which will further strengthen hunting, gathering and fishing culture as a core part of Inuit unity and identity.

The Summit is further directed by the Alaskan Inuit Food Security Conceptual Framework: How to Assess the Arctic From an Inuit Perspective. The report, which reflects the views and knowledge of Alaskan Inuit, emphasizes the need to build stronger co-management structures in order to support food security.

The Summit is intended to:

1. To affirm Inuit rights to the use of Arctic wildlife resources, the protection and promotion of Inuit culture, traditional practices and the management of these resources. The Summit is intended to support food security across the region by addressing the needs of Inuit for access to wildlife resources and knowledge of traditional management practices. The Summit is intended to support Inuit culture by addressing the needs of Inuit for the protection and promotion of Inuit culture. The Summit is intended to support food security across the region by addressing the needs of Inuit for access to wildlife resources and knowledge of traditional management practices. The Summit is intended to support Inuit culture by addressing the needs of Inuit for the protection and promotion of Inuit culture.

2. To share wildlife management practices employed within each country by identifying challenges and opportunities for self-determination, greater well-being, access and overall food security at all scales (local, national and international). The Summit is intended to support food security across the region by addressing the needs of Inuit for access to wildlife resources and knowledge of traditional management practices. The Summit is intended to support Inuit culture by addressing the needs of Inuit for the protection and promotion of Inuit culture.

3. To develop common and collaborative Inuit-based management frameworks to support food security across the region by addressing the needs of Inuit for access to wildlife resources and knowledge of traditional management practices. The Summit is intended to support Inuit culture by addressing the needs of Inuit for the protection and promotion of Inuit culture.

4. To develop common and collaborative Inuit-based management frameworks to support food security across the region by addressing the needs of Inuit for access to wildlife resources and knowledge of traditional management practices. The Summit is intended to support Inuit culture by addressing the needs of Inuit for the protection and promotion of Inuit culture.
