

Kim Daly

Mr. Daly's past includes a conviction at the age of 20, for indecent liberties. His victim was a 6 year old girl he had been babysitting. At age 25, he was again convicted of indecent liberties, where this victim was a 3 year old boy. The WSH Sexual Psychopath Program found him unamenable to treatment and remanded to DOC on March 9, 1985.

He was then released to an Adult Family Home in 1986. He then reoffended on May 12, 1999, when he was convicted again of indecent liberties. Court records show from 1986-1998 Mr. Daly sodomized an elderly demented male resident. Mr. Daly admitted to anal intercourse with two other male patients and vaginal intercourse with an elderly woman on numerous occasions.

During a 2002 polygraph, Mr. Daly reported watching 3 young boys who lived next door and thinking about sexually assaulting them. He also reported watching another young boy get off the school bus and had fantasies of being his "best buddy"; taking him to an isolated place and having "sex between his legs." Court records show that Mr. Daly's probation was revoked 5 times. Eventually his therapist (Comte's and Associates) terminated treatment due to his behavior and his risk for sexual re-offense. In a 2006 annual review, it was noted that Mr. Daly continues to be unable or unwilling to control his sexual behaviors, even in the most restrictive setting available.

In a 2015 Annual Review, it was noted that Mr. Daly's diagnosed mental disorders continue to predispose him to the commission of criminal sexual acts with male children.

The doctor noted that Mr. Daly is more likely than not to molest a boy at some point if unconditionally released to the community. A 2017 Annual Review noted that there may never be a time where he can live independently in the community without supervision.

Dr. James Manley, Ph.D., noted in the review the following :

On his last community outing, Mr. Daly also saw a mother with an infant and young girl. He stated, "I started crying and told the escort it's not right. I'm trying to stay away from kids. I started crying. It's not unusual for me to cry when I'm laying out what I'm thinking about. I don't like seeing kids. To me kids are a sex-object and I don't want to have a release. I told him about the deviancy and my desires."

Pursuant to Forensic Psychological Evaluation of James Manley, Ph.D. – PG 21. At this time he is viewed as a moderate risk to re-offend.
