

March 2020

To Our Customers and Community

Important Information Regarding COVID-19

At McDonald Modular Solutions, compliance with standards for safety and health are a daily priority. The COVID-19 pandemic has caused us to take additional steps for the sake of our customers, our employees and our community. We are closely monitoring and following Public Health, CDC and OSHA recommendations and guidelines.

McDonald Modular has taken steps to embrace social distancing, to reduce staff in our offices and limit travel. Everyone has a heightened awareness of protection and standards of hygiene in our daily lives. Further we have added steps to preparing the structures you rent or purchase to go beyond just clean and disinfect areas of likely contamination before delivery.

We ask for your understanding going forward as we will all adjust to situations as they arise and the most current information being received. We cherish our reputation; so your continued faith in our ability to provide a high standard of product and service while protecting the health and safety of us all is well placed.

Sincerely,

Employees and Management

McDonald Modular Solutions
