
GENERAL PRESENTATION

INERTIA

About us

INERTIA is a service company with France based headquarters and UAE based Middle East regional office.

Our expertise in improving the reliability and performances of drilling rigs is provided to O&G Companies, O&G Service Companies and Drilling Contractors with high consideration for customer satisfaction.

INERTIA operates globally on onshore and offshore facilities. Our work methods merge both the benefits of digital technologies with our comprehensive engineering expertise keeping client's satisfaction as our primary target.

Our in-house engineering capabilities and growing global network of business partners allow us to provide professional and reactive services compatible with today's market expectations.

Optimization of logistics, anticipation of site activities difficulties, inspections data security are key success factors delivered by our innovative remote supervision SaaS solution, also addressing carbon footprint reduction.

Going with INERTIA is choosing a quality-oriented partner and a team of professionals who will go the extra mile to ensure customer satisfaction.

A Quality System at the center of our operations

INERTIA operates an **ISO 9001:2015** Quality System specifically designed to ensure optimum traceability and reliability of our operations.

As part of its quality policy and objectives, INERTIA is committed to the continuous improvement of its quality management system.

In this context, the company has developed and implemented throughout 2019 a set of additional procedures to upgrade its existing QMS and comply with all the requirements of the **API Specification Q2**.

INERTIA's stage 1 and stage 2 audits will be taking place within the first semester of 2020.

Our service quality plans, coupled with systematic risk assessment and mitigation measures ensures our clients that INERTIA's services are planned in advance, leaving chance to the unexpected to the minimum.

Our services Rewarded

This January 2020, INERTIA has received the award for best commercial performance from the Dirigeants Commerciaux de France (DCF) .

This recognition highlights the growing enthusiasm that our **remote technical support & supervision solution** continues to spark, especially with clients in operating in **challenging locations**.

Indeed, INERTIA has developed strict work procedures alongside of a robust SaaS solution. This allowing us to deliver on logistic optimization, anticipation of site activities difficulties, inspections data security while also addressing carbon footprint reduction.

The solution is designed to tackle drilling rigs inspections and audits as well as various surveys such as DROPS, lifting points registers, hose management, etc.
