

HSEQ Policy

Borusan Mannesmann Pipe US provides products that enhance the quality of life and promotes the process of economic and social progress of our community.

Our HSEQ Policy provides a framework to establish the Health, Safety, Environment and Quality Objectives that are reviewed periodically to guarantee the suitability of the business.

The following policy is communicated and understood by all employees:

We are committed to comply and exceed the expectations of our customers by providing reliable products to the Oil and Gas Industry, protecting the health and safety of our employees, minimizing the environmental impact of our activities and continually improving the effectiveness of the IMS.

Humanity, Health, and Work Safety First
Cleaner Environment for a Sustainable Future

HSEQ Objectives

- Comply with applicable legal and other requirements to which the company subscribes.
- Incorporate the Health, Safety, Environment and Quality requirements in all company activities.
- Prevent injuries and ill health to personnel affected by company activities through a proactive risk management process.
- Reduce all types of pollution by assessing environmental impacts and mitigating their adverse effects.
- Improve operational performance by setting objectives and targets with their regular monitoring and evaluation.
- Improve competence and skill through training and awareness.
- Continually improve the effectiveness of the Integrated Management System by planning, measuring and reviewing its processes.
