I am trading demo. I view it as practice till we start. It has on one hand allowed me to increase my trading skills to the point where I have this calm excitement of what is possible. On the other hand, it's very draining to trade for paper money.

1. Yes  No

ii. I still have questions as to how it's going to come together. I use expert advisors that I use as tools for entry when I see a set up. I am also using a trade management program that takes over once position is entered.

iii. I understand and have no problem becoming intentional with my 5 minutes of biodata daily however as my thinking of trading is I guess evolving into viewing things from a more patient lens, perhaps I should limit my hours to maybe two sessions weekly. The markets have this power to suck me into the vortex and have me glued for 12 hours. With your course, my thinking has changed and feel more comfortable away from the screen.

#### 4) GENERAL FEEDBACK:

i. What would I like to see in the NT program that would improve the effects for myself and other traders starting the same peak performance journey?

1. Maybe a chat room or some way to interact with other traders in the same pursuit.

Click or tap here to enter text.

2. More on overtrading as opposed to fear based problems. How to stay focused after a big run. Emotional discipline

#### 5) TESTIMONIAL

a. Having completed this first phase of the NT program, please write a testimonial for other traders in the space provided below.

1. So far after a few months, my thinking has changed. I am understanding more how my ego, false beliefs and the caveman in my head have been in control of my trading in the past. I have become aware of this and look forward to my trading with me in control versus being swept away.
