- **GENERAL FEEDBACK:**

- What would I like to see in the NT program that would improve the effects for myself and other traders starting the same peak performance journey?

From personal experience better communication through email, but I know this isn't your fault its just a side effect of a new system combined with the construction and other factors making things not run as smoothly as we would like.

- **TESTIMONIAL**

- Having completed this first phase of the NT program, please write a testimonial for other traders in the space provided below.

I started the program with the best intentions, I had a few large life events happen that made me fall behind (Lost a friend in a car accident two weeks into the program and then had someone hit my car right after in which my vehicle was totaled). Ken worked with me and was more than accommodating in helping me get back on track and caught up so I could make the most of the NT Program. Once I was back on track I saw a complete turn around in my trading, I went from break even to profitable and we had not even started with the biodata yet.
