4) GENERAL FEEDBACK:

- i. What would I like to see in the NT program that would improve the effects for myself and other traders starting the same peak performance journey?
1. The mentoring has been immensely valuable but I understand it is not scalable.
 2. The ATM course is the best trading/training system I have come across. It is exactly what I was missing and looking for. ALL traders need to take and use the course material.
 3. The weekly meetings are a great source of motivation. Hearing Ken and Chris speak about their experience and vision is very inspiring.

5) TESTIMONIAL

- a. Having completed this first phase of the NT program, please write a testimonial for other traders in the space provided below.
 1. Every new trader has received the advice, learning the mental/psychological aspects of trading is more important than the technical aspects. Like most traders, I ignored this advice and focused 100% of my time learning the technical side. Well, after 3 years of losing money and feeling like I'm running in circles, it may be time to admit I am missing something. The Neurotrader program felt like the perfect solution. A wearable device that can help me fix all of my mental roadblocks without the need to do the work myself. However, working with Ken, he has shown me how my past trading experiences and family influences as a child, has created beliefs/behaviors that were not congruent with being a consistently high performing trader. I now see how these emotions and beliefs are causing me to repeat the same mistakes over and over again. It has only been 2 months since the program has started, but I feel I am making huge breakthroughs in my psychology, both in trading and personally. I am excited to continue this work and I am looking forward to impact this WILL have on my trading.
