#### 4) GENERAL FEEDBACK:

i. What would I like to see in the NT program that would improve the effects for myself and other traders starting the same peak performance journey?

1. A little bit more practical techniques that help to put in practice some of the advice given in the lessons.- - maybe refer traders to specific lessons/techniques in the ATM course.

2. The team meetings are great. The emphasis on mindset is excellent so this is a point to preserve.

## 5) TESTIMONIAL

- a. Having completed this first phase of the NT program, please write a testimonial for other traders in the space provided below.
  1. The NT program is an empowering program, whose aim is to take traders at many experience levels and bring them to peak performing state. There are lessons, team meetings webinars with very dynamic Q&A and private mentoris sessions to address specific issues. Ever since I started I see an improvement in my trading mindset, calmness, ability to stick to my trading plan in terms of setups, pre-defined risk and take profit levels, and the results are much more consistent and positive. To think I much more I will improve once the phase of the bio-data collecting and analysis will start is mind blowing. I recommend each trader to enroll in one of the paths. It is a very worthwhile investment.
