4) GENERAL FEEDBACK:

i. What would I like to see in the NT program that would improve the effects for myself and other traders starting the same peak performance journey?

1. Both Ken and Chris have mentioned the progress of other traders during this program, I have not been trading as I didn't want it to interfere with the lessons. Communicating clearly about trading expectations or options such as simulations, etc. throughout the program would have been helpful from the beginning to alleviate the stress of trading while being monitored once the device is incorporated. I was unaware that this program would be solely centered around the psychology and probably would have elected to incorporate more individual trading on my own time had I known from the start. Since we have not received any training as it relates to trading strategy, I assume that both Ken and Chris believe all traders in the program have a strategy that they wish to implement during this program or have gone through Chris' course.

3. I feel there was some value lost in some of the webinars in which they could not be uploaded for various reasons or calls were cancelled. The

first half of this program progressed too slowly in my opinion if you were assuming we were using this program alone, not in conjunction with the 2nd skies coursework. For example: There was a class solely dedicated to attaching the device as a bluetooth to the computer. This was a waste of time as most people are tech savvy and didn't need a full video demonstration in addition to the powerpoint, which was sufficient in my opinion.

5) TESTIMONIAL

- a. Having completed this first phase of the NT program, please write a testimonial for other traders in the space provided below.
 1. Both Ken and Chris have been great to work with and have excellent insight as it relates to a traders' mind and the development of such. I appreciate that as we provide feedback throughout the course, they are both eager to adjust what they have been doing to accommodate the needs of the traders. I am grateful for having access to the ATM course to help solidify how our psychology affects our trading and ways to conquer the issues we come across. The expertise of Ken and Chris is more than I had expected and I look forward to the second half of the program.
