#### **4) GENERAL FEEDBACK:**

i. What would I like to see in the NT program that would improve the effects for myself and other traders starting the same peak performance journey?

**1.** There's a lot of good information in the lessons, but they feel idealistic at times and the pace was slow. 2 lessons a week would have been better. We should all be striving for those goals, but there could be more on what to do if you aren't there yet in those areas or releasing any guilt that you might have around those areas. The tests also seem pointless since I don't get any feedback from the results.

2. I understand the logic behind teaching the psychology first and I realize that the tech wasn't ready yet, but I feel that it would be useful to track my trading right from the beginning to establish a baseline, then start teaching the material. Then the mentor could identify trading tendencies beforehand, so I would have a better idea on what to focus on and they could later relate sessions directly to trading results.
3. I feel it would be useful to provide a list of other resources that could help with resolving emotional issues. I've gained a lot from trying out different things and different modalities will work for different people.

## 5) TESTIMONIAL

- a. Having completed this first phase of the NT program, please write a testimonial for other traders in the space provided below.
