2. Meeting communicated deadlines.

3. n/a

#### 5) TESTIMONIAL

a. Having completed this first phase of the NT program, please write a testimonial for other traders in the space provided below.

1. What I really like about this program is the (forced) slow and methodical process which is very common in other professional fields/tradinings,

but the exact opposite to how aspiring traders treat their trading career. Most traders start out with no clear learning process and jump ahead + skip the most important parts, just to satisfy their need to focus on charts alone. But as anyone who has succeeded in other professional areas knows, the foundation is the most important, something most aspiring traders never build.

On top of the slow and steady approach, the first 10 weeks focus heavily on areas that are completely overlooked by most traders, yet are critical to achieve success and peak performance in any field.

Not only am I convinced that working with the 10 key topics of life provided in the first 10 weeks will improve trading performance, it will likely also have a massive positive impact on ones understanding of him/herself, a massive positive impact on ones relationships in life and a massive positive impact on performance in any skill based field that requires a peak state of mind and body.
