5) TESTIMONIAL

a. Having completed this first phase of the NT program, please write a testimonial for other traders in the space provided below.

1. The NeuroTrader Program has proven to be helpful for my trading as it delves into all areas of my life to locate any issues which may act as obstacles to better trading performance.

I always believed that we traders are like professional athletes - once developed the technical skills, it is the mindset that sets apart the winners and losers, sometimes by less than a split-second. Trading is no different - my analytical skills have been more than adequate and I have been confident of it. However, my result did not reflect my analytical skills because my psychology was lagging behind.

Therefore I strongly believe that NeuroTrader Program is one of the crucial factors to getting me to reach the right mindset I need to become a consistently peak-performing trader.

I can already see and feel the improvements in my trading mindset, and we're just about to commence the biodata phase - I can't wait to keep on improving with NeuroTrader Program!
