

Construction Design and Management Regulations 2015:

Tower Training and Consultancy was established to offer excellent service based on real world experience and a passion for doing health and safety better.

We are safety professionals who have worked on significant construction projects of strategic importance and understand the need for practical solutions.

Who is this for?

The programme indicated is intended for those carrying out significant works in the client role. Similar programmes can be offered for other CDM roles on request. It is intended to give staff the competence to operate effectively in a CDM role as part of a safety management system.

Shorter courses and assessment processes are available for those in non-practitioner roles or where project are of low complexity.

Duration

The indicated course is 2 days plus assessment. Awareness courses are one day, with or without assessment.

Facilities and numbers.

Normally at clients premises (but arrangements can be made if required). We recommend between 5 and 12 candidates.

Materials

Candidates will be supplied with a full set of course slides and a copy of L153 Managing health and safe-

Construction Design and Management Regulations 2015:

General Area	Outline
General Duties	<p>An explanation of general responsibilities set out in Sections 2 and 3 of the Health and Safety at Work Act 74. Consider the meaning of the term “undertaking” and how duties and liabilities are shared between clients and contractors.</p> <p>Consider how anticipated distribution of liability can be affected by the intervention of clients exerting inappropriate control over works, with appropriate case law.</p> <p>Penalties.</p>
CDM	<p>Develop the ideas under general duties section, to show how CDM applies those principals to the specific situation of construction.</p> <ul style="list-style-type: none"> • Definition of construction. • Notifiable v non notifiable schemes • Duty Holders • Clients (inc preconstruction information) • Designers/Principal Designers (Inc Principals of Prevention) • Contractors and Principal Contractors (Inc Construction phase plan)
Your systems (optional)	<p>This section may be separate, or integrated into each CDM section as each duty holder role is dealt with if you already have a developed CDM process.</p>
Audit and Inspection	<p>Using a practical exercise, candidates will develop a draft audit/inspection sheet and programme. This brings together themes within the course, for example around managing the contract taking on contractor liabilities; a consideration of the impact different inspection/audit styles may have on relationships and intended outcomes.</p>
Assessment	<p>THREE part assessment.</p> <ol style="list-style-type: none"> 1. A multi-answer examination paper to ensure candidates have a sound knowledge of the principals and legal requirements of CDM. <p>TOWER will mark and in the event of a marginal fail, we suggest candidates may retake the same paper within two weeks. A repeat failure would necessitate resitting the whole course.</p> <ol style="list-style-type: none"> 2. A project-based audit/Inspection. TOWER will mark the report and candidates failing the assessment may carry out a further audit within 4 weeks. Repeat failure would require re-sitting the whole course. 3. Authorisation by the relevant person within the client organisation. it provides an assessment of experience, personal qualities and ability which can not be adequately assessed by qualification alone. It also means that in the event of performance concerns or a change of CDM role, or projects of significantly greater complexity, the company can retain control over staff authorised to represent it. <div style="text-align: right;">  </div>
