

CORONAVIRUS

Steps Our Practice Is Taking:

Team members who are sick are required to stay home.

All equipment and patient contact surfaces are sanitized after each use and again at the end of the day.

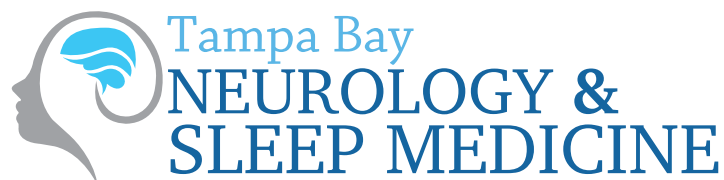

Sanitizing stations have been placed in each office.

Our team members wash their hands after contact with each patient and throughout the day.

We are pre-screening and rescheduling all patients who have recently traveled and/or are experiencing symptoms of the virus.

We are closely monitoring communications from local, state, and federal agencies and will continue to communicate updates to our patients.

Please call 813-564-0140 if you have any questions.
