

# Modalities Used At Spa98

## Dermaplaning

A sterile surgical blade is used to remove vellus hair (peach fuzz) and the top layer of dead skin. This modality accelerates cell turnover, allow products to penetrate deeper, and provides a smooth finish for your makeup application.

## Diamond Peel Dermabrasion

Dermabrasion is a safe version of microdermabrasion by using a suction-like tool with diamond encrusted tips. This modality is designed to help remove top layer of debris and dead skin, diminish fine lines, remove scarring, and leave you with a smooth texture and fresh glowing skin.

## RevitaPen

The RevitaPen is collagen induction therapy known for creating micro-channels to ensure deeper product absorption. The goal of this treatment is to gently exfoliate, increase hydration, diminish fine lines and wrinkles, while improving skin texture and increasing circulation. There is no trauma or inflammation to the skin and no downtime is necessary. \*best results achieved in a series of 4-6 treatments

## LED Therapy

The Anti-Aging (Red LED): In just minutes a day, you can reduce the appearance of fine lines and wrinkles, while experiencing an improvement in skin texture, quality and smoothness. Using wavelengths that are scientifically proven to stimulate fibroblasts to increase collagen and elastin, Celluma's low-level light therapy is a safe, effective and convenient way to achieve a healthy, youthful glow in a natural, non-toxic, non-invasive

manner. This treatment is great as an add on during a facial or stand alone for at least 20 min.

Acne (Blue LED): Let's clarify: When P. acne bacteria builds up in pores, skin becomes inflamed, causing acne lesions and blemishes. Celluma light therapy works safely and effectively, without abrasive chemicals, harmful UV-rays or side effects, to destroy this acne-causing bacteria — not only clearing up existing blemishes, but preventing future breakouts before they happen. In just minutes a day, you'll be on your way to a clearer, smoother, more radiant complexion. This treatment is great as an add on during a facial or stand alone for at least 20 min.

## BT- Micro

The bt-micro is the ultimate in hand held professional technology that offers ultrasonic exfoliation using forward thinking patented technology. bt-micro ultrasonic exfoliation works by creating high speed oscillations, leaving skin smooth, fresh, and perfectly prepared for product application. This is an award winning device and packs a punch.

## Jade Roller/Rose Quartz Stone

Soothing stones are incorporated within facial massage to support lymphatic drainage and reduce puffiness and inflammation. These tools are great for contouring and lifting while increasing the circulation. The facial muscles require a workout too.

## Microcurrent

Non-invasive technology using specific frequencies to regenerate the cells and tissue back to their normal state. The ultimate goal is to stimulate, tone, and tighten the facial muscles and prevent the aging process. If anything can help turn back the clock, this relaxing modality is it.
