Recap on learning from Year 1 (look at the 'What should I already know?' section on the Knowledge Organiser) using websites, images, videos or real life experiences i.e. go on a plant and tree hunt and look at their parts closely.

This project has 6 lessons. 1 lesson to be completed each week, preferably on the same day. Do not rush through the project as it involves growing and measuring plants and completing a science investigation, over a period of time. Ensure to look at the lesson plans and activities in advance so you can get resources prepared.

If you do not have access to a printer, don't worry! You can improvise! Use the Powerpoint presentations, worksheets and lesson plans as guidance, then you can draw and write in your work book.
