Sanitising stations to be available at the entrance and exit of the pitches.

A one-way system to be clearly marked. The entrance to the pitches will be the usual entrance with the exception for Senior f

In competitive football activities the Covid-19 officer of each club will ensure a safety briefing is provided before th

Risk assessment to be issue to all away teams prior to attendance.

When the ball goes out of play it should not be retrieved by non-participants and should be retrieved using the feet rather than hands.
 Where there are breaks in the game, or training, if throw-ins or handling has occurred the ball should be thrown or handed to a participant.
 Pre-match handshake should not happen. Instead players will be asked to hand-sanitise before the match.
 Team talk huddles should not take place. Team talks can take place, as long as social distancing is observed and participants are wearing masks.
 Warm-ups/cool-downs should always observe social distancing.

Coaching staff and substitutes, to spread out and avoid sharing a dug out or bench if social distancing is not possible.
 Social-distancing must also be observed during interactions when a substitution is being taken.

Set plays – corners and free kicks should also be taken promptly to limit prolonged close contact.
 Goal posts to be wiped down before matches, after matches and at half time. Goal celebrations should be avoided.

Interactions with referees and match assistants should only happen with players observing social distancing.
 Avoid shouting or raising your voice if face to face with other players.

Officials must be restricted to discrete six-person gathering limits and spread out.

Equipment should not be shared, and goalkeepers should ensure they disinfect their gloves regularly in breaks in training or matches.
 Equipment should only be handled in training.

All participants must remain socially distanced during breaks in play, with spaced areas for equipment and refreshment storage for participants.
 Coaching staff and substitutes, should, for example, spread out and avoid sharing a dug out or bench if social distancing is not possible.

Players and officials should also observe social distancing during sin-bin instances.

Water bottles or other refreshment containers should in no circumstances be shared. Participants are advised to bring their own.
 If participants become symptomatic during the session, they should immediately remove themselves from the session and return home.
 The management of symptoms should be followed.

All touch services such as door handles, container handles, hand rails to be periodically disinfected.

Hands to be washed or sanitised at the earliest opportunity and personal equipment should be wiped down after use.

Individuals to take their own kit home to wash it themselves, rather than have one person handling a large quantity of soiled material.
 In circumstances where this is not possible (e.g. last-minute stand-in players, shortage of kit, or an essential club function), each person handling it must wash or sanitise their hands.
 Cleaning arrangements for the kit must be made.

After training sessions and/or matches, participants must maintain government mandated social distancing for social interaction. This applies to any other venue that participants may congregate in afterwards. As such we will not be inviting providing a social gathering.

First-aiders to be equipped with the appropriate PPE (including face coverings) to protect themselves and others if they need to contact a participant for medical assistance.

After contact with an injured participant, the person who has administered first aid should clean their hands thoroughly with soap and water at the earliest opportunity. This advice is applicable to all situations, regardless of whether there was close contact or the minimum 2 metres.

The first aider should also avoid touching their mouth, eyes and nose.

First-aiders or their equivalent, should keep a record of each participant they have come into contact with for 14 days.

To remain closed during all training and pre-season games if applicable.

Low (acceptable)	1	
Medium (adequate)	2	
High (tolerable)	3	
Very High (unacceptable)	4	

No further action required
Consider risk against benefit. Monitor and look to improve at next review
Re-evaluate risk rating. Seek further advice e.g. line manager, H&S team, etc.
Stop activity. Implement immediate improvements
