

# THE MATHEMATICAL FOOD DIAGRAM

A rendering by Russell A. Smith on *Beelzebub's Tales to His Grandson* pages 786-792.

This totality of the first being-food corresponds with its vibrations to the last Stopinder (**TI-DO**) of the being-Heptaparaparshinokh, and it enters the 'higher-intentionally-actualizing-Mdnel-In' of the law of Heptaparaparshinokh; and in order to transform completely into new higher vivifyingness, it inevitably requires just that foreign help which is actualized only in the presences of the three-brained beings exclusively owing to 'being-Partkdolg-duty,' that is, owing to just those factors which our COMMON FATHER CREATOR ENDLESSNESS consented to foreordain to be the means by which certain of the Tetartocosmoses might become helpers in the ruling of the enlarged World and which factors also until now serve as the sole possible means for the assimilation of the cosmic substances required for the coating and perfecting of the higher being-bodies and which we at the present time call 'conscious labors' and 'intentional suffering.'

↑ From the **cerebellum**, a part of the 'being-Piandjoëhary' (**SO-LA**), passing through the 'nerve nodes' of the **spine** and the **breast**, is concentrated in the beings of the male sex, in what are called '**testicles**' and in the beings of the female sex in what most of your favorites call '**ovaries**,' which are the place of concentration in the common presences of beings of the 'being-Exioëhary' (**LA-TI**).

↑ Just these same substances of 'being-Piandjoëhary' (**SO-LA**), according to the fifth deflection of the Sacred Heptaparaparshinokh, have the free possibility of giving, in the manifestations of the common presences of three-brained beings, results not similar but 'opposite to each other' (**SO-LA--Harnel-Aoot**). That is why, in respect of these being-substances, the beings themselves must always be very, very much on their guard in order to avoid undesirable consequences for their entire whole.

Being-Tetartoëhary (**FA-SO**), mixing by means of the process Harnelmiatznel with previously formed higher substances already present in the beings is gradually transmuted into still higher being-active-elements called '**Piandjoëhary**' (**SO-LA**). And these substances have as the central place of their concentration in beings the, what is called, 'Sianoorinam' or, as your favorites call this part of their planetary body, the '**cerebellum**,' which in beings is also located in the **head**.

'Astralnomonian-Protoëhary' (**DO-RE**) itself is transmuted into the substances named '**Astralnomonian-Defteroëhary**' (**RE-MI**).

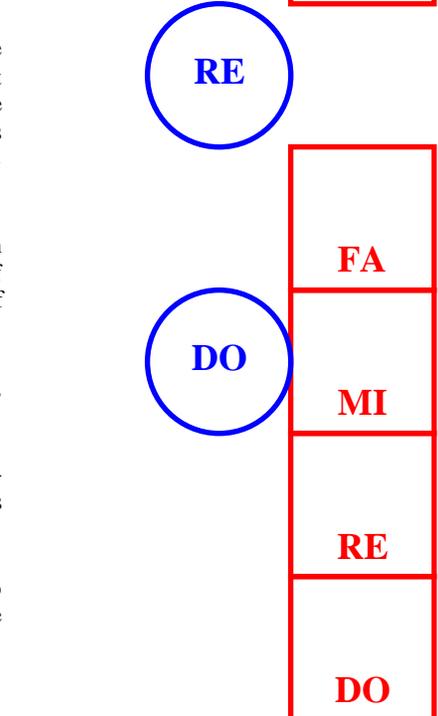

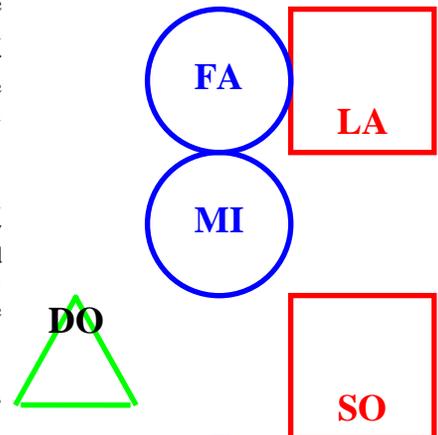

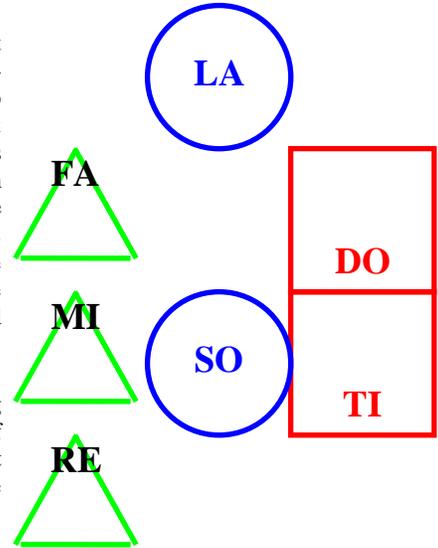

The substances of this 'Astralnomonian-Protoëhary' (**DO-RE**), mix with the totality of substances of the first being-food and thus help these substances of the first being-food to pass through the lower 'mechano-coinciding-Mdnel-In' (**MI-FA**) and to be transmuted into other definite substances, into 'being-Tetartoëhary' (**FA-SO**), which has in beings as the central place of their concentration both of what are called the '**hemispheres of their head-brain**.'

The active elements which compose this second being-food or air, beginning from the **nose** of beings, gradually evolve with the cooperation of various processes of Harnelmiatznel of local character, and are transmuted in the what are called '**lungs**' of beings into '**Astralnomonian-Protoëhary**' (**DO-RE**).

'Being-Defteroëhary' (**RE-MI**) is transmuted into 'being-Tritoëhary' (**MI-FA**), which has its gravity-center place of concentration in the '**liver**.'

The being-Protoëhary (**DO-RE**), passing--thanks to the process Harnelmiatznel--over the whole of what is called the '**intestinal tract**' is this time transmuted in what is called the '**duodenum**' into 'being-Defteroëhary' (**RE-MI**).

Active elements enter from the **mouth**, and through Harnelmiatznel they begin to be gradually changed, and are transmuted in the **stomach** of the beings into definite active elements named 'being-Protoëhary' (**DO-RE**).
