

## Practice the 5 times table.

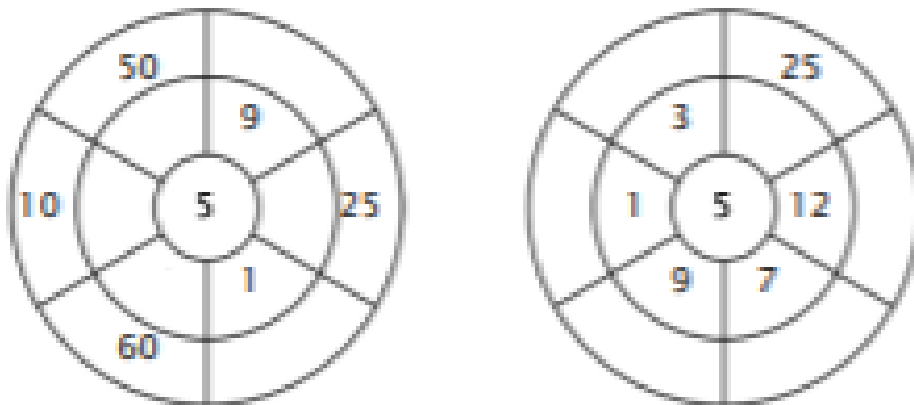

### Exercise 1:

Write these numbers out into two columns – numbers in the 5 times table and numbers not in the 5 times table.

4	17	35	1	5
50	6	5	20	55
37	50	54	33	25
42	30	62	45	46
5	60	22	30	15

### Exercise 2:

Draw and complete the circles by multiplying the number in the centre by the middle ring to get the outer numbers.

### Exercise 3:

Copy these questions into your book and complete them:

$7 \times 5 = \underline{\hspace{2cm}} \quad 5 \times 5 = \underline{\hspace{2cm}} \quad 9 \times 5 = \underline{\hspace{2cm}}$

$4 \times 5 = \underline{\hspace{2cm}} \quad 12 \times 5 = \underline{\hspace{2cm}} \quad 10 \times 5 = \underline{\hspace{2cm}}$
